No-Code KPI Decks

A PowerPoint deck from one Excel settings sheet

THE PROBLEM

Every new KPI deck needed a programmer to write its charts in code.

WHAT I BUILT

An engine that builds the PowerPoint deck from a template and one Excel settings sheet, and checks every row first.

THE RESULT

A new deck without code: 47 charts from 52 equations, 5 chart types in 10 layouts.

No code
to build a new deck: a template and a spreadsheet

47 charts
in one settings file, from 52 equations

5 types
of chart in 10 layouts, in one shared style

TOOLS

Python · pandas · Plotly · python-pptx · openpyxl · Excel settings · PowerPoint templates
