Event-Day Reports

Hourly KPI reports that fill themselves on Ramadan, Eid and concert days

THE PROBLEM

On big event days, such as Ramadan, Eid and concerts, engineers filled the hourly KPI reports by hand.

WHAT I BUILT

A tool that reads each hour's network export, fills every region's report template and sends it on the hour.

THE RESULT

About 98% less manual data entry on event days.

98%
less manual data entry on event days

Every hour
a report for each region, through the whole event

2G to 5G
in one export, merged on hour and site group

TOOLS

Python · pandas · openpyxl · Excel templates · regex · NetAct KPI exports
